

# Center For Life

"Changing Lives Through The Chiropractic Experience"

## Philosophical Agreement

Wellness exists when the entire body functions at 100% under the direction of the innate intelligence of life.

The Nerve System is the medium by which this innate intelligence travels to control and coordinate all body functions. Normal free transmission of neurological impulses between brain and body is necessary for normal life expression, which is wellness.

Subluxations of the spine caused by displacement of vertebrae interfere with the normal physiology of the nerve system. Subluxations may be caused by physical, chemical, or emotional stresses, which the body can not integrate properly. Abnormal transmission of neurological impulses can result. This may result in a reduction of normal life expression, leading to dis-ease, ill-health, and loss of full potential.

Chiropractic adjustments help the body to remove interference to the nerve system caused by subluxations of the spine. This leads to improved neurological function. Each individual can then function and express life better, have a greater resistance to ill-health and dis-ease, and gain the potential to heal and recover.

**Chiropractic is not a form of medicine, nor a replacement for medical care. Medicine specializes in the treatment of diseases. Chiropractic specializes in restoration and expression of life.**

We do not diagnose, treat, or cure disease. We do not attack or suppress symptoms. If, during care, you become concerned about your symptoms or your condition, we suggest that you seek the help of a symptom, sickness and disease care professional. Our only goal is to free interference to life energy caused by subluxations. The power that creates, is also the power that heals.

I, the undersigned, have fully read and understand the above statement and agree to receive chiropractic care with this understanding.
